### 2. Product Country-of-Origin Change

#### Background

From April 2016, production of DDS Series of Wiper Blade shifted from KWB (Korea) to NWBJ (Japan). This change is also reflected in the packaging: "Made in Korea" → "Made in Japan". The product and performance is still the same as before.

#### Next Action

Please be reminded that this is a running change and as much as possible, we will try to minimise different country-of-origin in the same batch of shipment.

For more information, please contact your DENSO Sales Company.
