2. Product and Packaging Box Design Change

Spark Plug – Iridium Series

information was sent out via email in Jan'18 from Regional to each Sales Company. This serves as a reminder.

<Background 1 – Product Design Change>

To improve production efficiency and therefore to increase production capacity, the appearances of IR Power series is changed from Feb'18 production onwards.
 Two changing points are considered as below:

Change point	Purpose	Product	Current SPEC	New SPEC	Negative impact for performance		
① Remove 3 lines on insulator	Improve production efficiency	IR Power IR Tough IR Racing	3 lines (193 PNs)	Remove 3 lines as same as OE (197 PNs)	1 type	None *Appearance change only	
			No line (4 PNs)				
② Reduce types of terminal nut	Improve production efficiency, and installation reliability	IR Power IR Tough IR Racing	Gold coat *Removable (85 PNs)	Phase out "Gold nut", then change to "Silver" or "Solid"	2 types	None *Refer to below for details	
			Zn die-cast *Removable (47 PNs)				Applied only for 2W & Old application (60 PNs *Removable)
			Iron nut *Solid (65 PNs)				Most of PNs will be changed to "Solid" as same as OE (137 PNs)

<Background 2 – Box Design Change>

Due to Customer Protection Law Requirement in each country, we revised the packaging box of our maintenance products to include in local language*

*countries with DENSO office presence will include local language as required by law.
